

INTRODUCTION

SIM Medical Sales was started over 25 years ago as a surgical accessories manufacturing company. We have provided orthopedic surgeons with the highest quality burs and blades in the industry at the lowest possible price. We have always packaged that with our greatest company asset Customer Service!

Over the years we began to see a growing need for our products in the veterinary field. SIM realized that a typical sales approach based on large hospital consumption simply did not meet the needs of veterinary surgeons. Thus, the introduction of SIM Veterinary.

Veterinary surgeons demand the highest quality products in order to provide their patients with the highest quality of care. Controlling costs for the families of their patients is also a constant concern. These two basic needs fall right in line with the SIM philosophy of quality and value. While these are important, we realize that veterinary surgeons also deserve personalized service and recognition of the needs of a small business owner. That is why you will speak to an actual person when calling for help or placing an order. That is also why we have no minimum purchase when placing an order. You will also gain the advantage of products that are specifically manufactured for multiple use.

At SIM Veterinary our goal is simple. To prosper as a company by meeting and exceeding the needs of our customers. We pledge to you that we will always evaluate all that we do from the perspective of your view.
